# SITUATION SUMMARY

## Tropical Storm Polo, Eastern Pacific Ocean

Polo is currently a Tropical Storm is currently located 165 miles south, southeast of the southern tip of Baja California, Mexico.

- Moving northwest at 8 mph
- Maximum sustained winds of 45 mph
- A west, northwest to west track is forecast to continue for the next 2-3 days.
- Gradual weakening is expected over the next 48 hours
- Tropical storm force winds extend 90 miles
- There are no watches or warnings in effect for the United States.
- Based on the forecast track and wind radii, tropical storm force winds are anticipated to remain south of the Baja California peninsula. Since any unexpected deviation to the north of the forecast track could bring tropical storm force winds to the coast, the Government of Mexico is keeping the tropical storm watch until Polo begins to move away from Baja California Sur.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

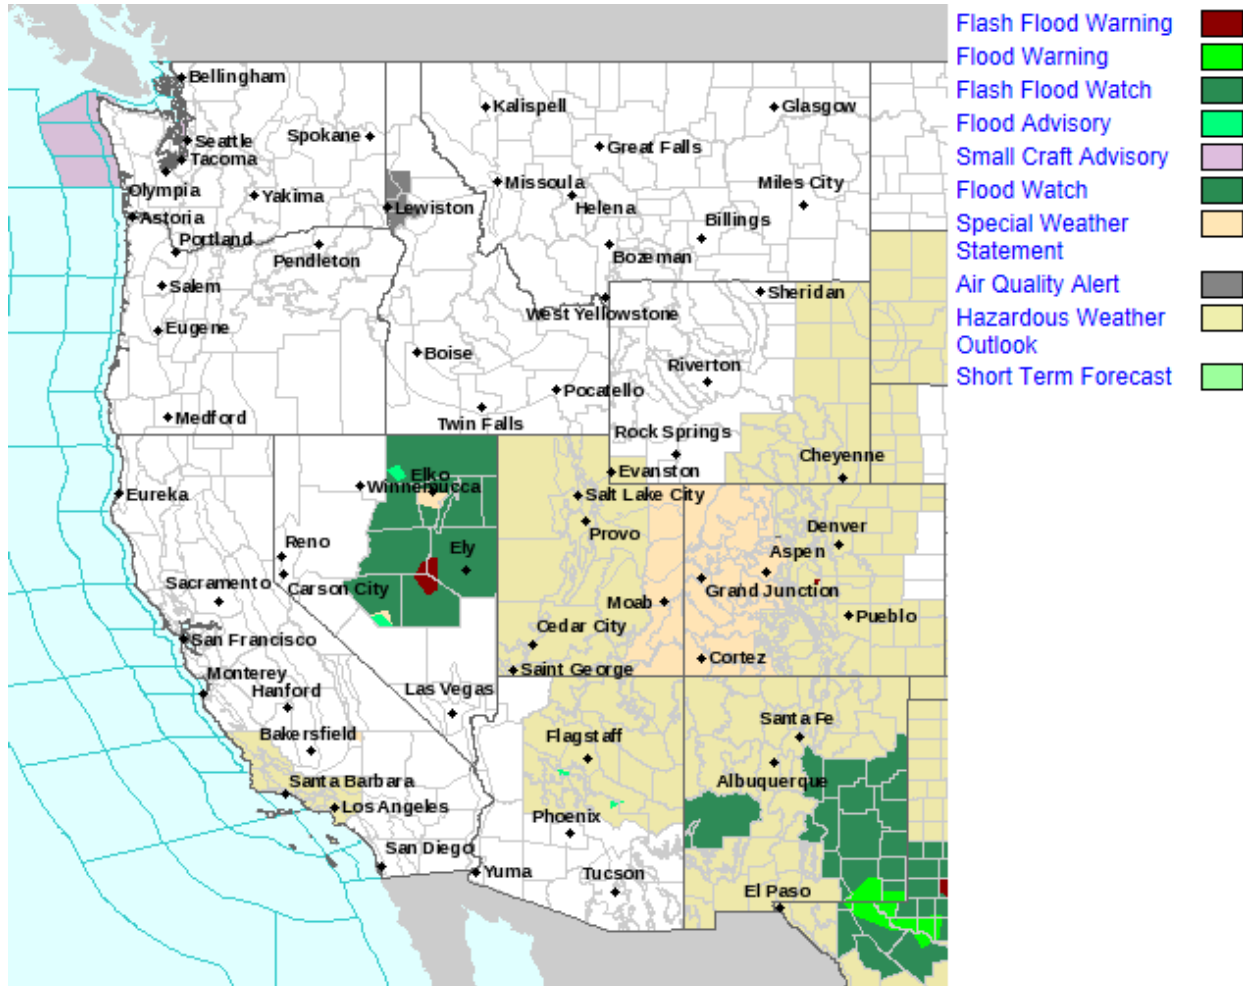

### **NORTHERN CALIFORNIA**

Low pressure centered off the Southern California coast will be moving slowly northeast for the next few days. Moisture and instability will circulate around the low over our eastern areas for the next few days. There will be a chance of isolated, mainly afternoon and evening showers or thunderstorms over the eastern areas today and Sunday, though mostly from about Mount Lassen southward today. The rest of Northern Operations will be sunny this weekend except near the coast where the marine layer persists. Monday and Tuesday will be in between weather systems with dry, cooling weather prevailing. A weakening trough approaching the coast Monday will turn the winds more decisively south to southwest. A stronger weather system will approach the coast Tuesday and the south to southwest winds will increase to become moderately strong. The strong weather system will move ashore Wednesday and spread much cooler, wet weather inland Wednesday afternoon through Friday. Some areas are likely to receive quite a bit of rain, especially in the western areas and northern mountains. Relatively strong south to southwest winds are likely Wednesday night, especially over the ridges. A few wet thunderstorms are possible with this system. Next weekend high pressure quickly returns over the region from over the Pacific. This classic weather pattern sequence will bring us dry, warm weather and north to east winds that will return drier conditions to the area.

### **SOUTHERN CALIFORNIA**

Scattered showers and thunderstorms will form across the Sierra and the deserts bordering Nevada this afternoon through this evening as a weak area of low pressure off of Point Conception moves inland. Elsewhere across Central California, there will be isolated showers and thunderstorms this afternoon. Southern California will be to the south of the low pressure area and will likely remain dry. A few showers and thunderstorms will continue across the Sierra through Sunday afternoon as the low pressure area moves into Nevada. There will be little change in temperature and relative humidity across the region this weekend. Maximum temperatures will be in the upper 60s and 70s across the mountains and 80s to low 90s in the valleys. Minimum relative humidity will be mainly between 20% and 40%. Temperatures will warm to a little above normal and relative humidity will become low Monday through Wednesday as a ridge of high pressure builds into the region from the southwest. Winds will continue to be light through the middle of next week. A Pacific trough will bring a big cooling trend and strong onshore flow to the region late next week. At this time, it looks as though scattered showers will move across the northern half of Central California late next week.

## **Magnitude 6.0 Earthquake, American Canyon, Napa County**

### **Recovery**

- Based on a request for additional IA information for the major disaster declaration request, IA teams conducted PDAs 09/8/14 through 09/12/14 in Napa County, the City of Vallejo, and Solano County. IA PDA teams conducted additional PDAs 9/17/14 through 9/19/14 finalizing PDAs in Napa County.
- The City of Napa website has information regarding earthquake recovery resources.
- Cal OES Recovery PA worked closely with the Operational Areas to schedule the PA Applicants Briefing to advise state agencies, local governments, and private non-profit organizations impacted by the earthquake the types of assistance available and the programmatic guidelines. Time and location: 09/23/14 at 1000 hours at the Napa Valley Exposition in the Chardonnay Hall, 575 3<sup>rd</sup> Street, Napa, CA.
- The Napa Long Term Recovery Committee (LTRC) is in the process of forming its leadership, establishing policies and procedures, and identifying a Mission statement. A follow up meeting is pending.
- State Voluntary Agency Liaison (VAL) participated in a Long Term Recovery discussion meeting on Monday, 09/15/14. Participants included several voluntary organizations, state and federal VAL, and leadership from Northern CA and Solano VOAD. A presentation on long term recovery and update on current recovery efforts was provided. Due to the absence of local faith based and other organizations that may have resources, SVOAD will reach out to expand the engagement of additional nonprofit and faith based partners. Once the organizations are identified, a follow up meeting will be held in hopes of identifying key leaders interested in forming a LTR committee.
- American Red Cross Assistance Center: Napa Marriott Hotel opened on 09/01/14 from 1000 to 1900 hours for Napa and Solano County; center will be open for two weeks.
- Local Assistance Center (LAC): County and City of Napa: LAC opened on 09/08/14 at 301 1st Street, Napa (corner of 1st Street and Silverado Trail). The LAC is open until further notice.
